

## Empowering Education in Dubai

Complete control over homework management

**C. Venter**

Assistant Headteacher  
Dubai English Speaking  
College

Dubai English Speaking College is committed to providing students with the platform they need for high quality learning opportunities. They are a highly regarded, consistently outstanding provider of English curriculum education in Academic City, Dubai

### Customer success story

Show My Homework (SMHW) has truly transformed homework at Dubai English Speaking College (DESC). Students now know exactly what is required of them and have all the resources readily available to support them and ensure the homework they complete is of the highest standard.

“ Staff love the system - they can upload homework for weeks in advance and plan in a more systematic way than before ”

## Parental engagement

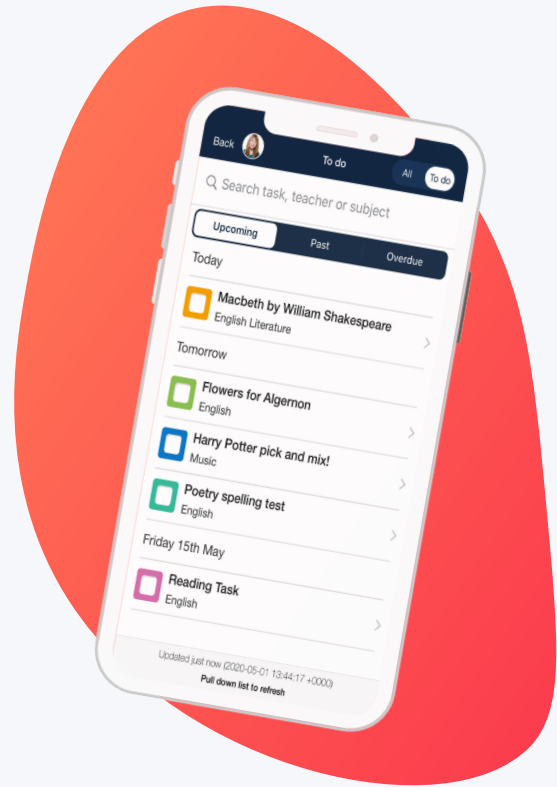

For parents it's an absolute game changer as now they are finally in the know regarding the tasks their children are meant to be completing at home. They have all the resources and information they need to provide full support and are delighted that Satchel One empowers them in this way.

## Reducing teacher workload

Staff also love the system because they can upload all their homework online for weeks allowing them to plan ahead in a more systematic way, and the ability to edit homework planned in advance means they can continue improving the quality of work set based on what's covered in their lessons.

It's also helped staff to save time and share best practice through sharing set homework tasks across departments and beyond.

“Parents are delighted as they are now, finally, fully in the loop about what their children are supposed to be doing at home!”

## School management made easier

The Reports function means that Senior Leaders and Heads of Department are now able to track not only the amount of homework being set as well as submitted, but also the quality of this work.

This means that the time they spend on admin has been cut down considerably and also provides them with complete visibility when it comes to knowing how well their students and staff are performing with regards to homework.
