

# Track and Nurture Engagement

Using data to keep parents and students engaged with education

Teacher  
The Piggott School

The Piggott School is a Church of England secondary academy in Reading. It has over 1500 students and is a certified international school. The school aims to help students develop, "by providing a caring environment based on Christian values".

The school used Satchel One throughout lockdown and beyond to keep distance learning on track and monitor parent and student engagement.

## How did you use Satchel One during the national lockdown to continue teaching and learning?

We used it to set work for all year groups who were affected by the lockdown. In addition to setting work online, we used it to track pupil and parental engagement with schoolwork via Satchel One's helpful analytics features.

## What is the greatest benefit your school has seen since using Satchel One?

The ability for parents and pupils to access homework remotely. This has greatly reduced the amount of parental interaction we used to have over homework, compared to the previous system we used. Parental feedback for the platform is also very positive.

## Why would you recommend Satchel to another school?

Because it is easy to use for both staff and pupils and for the tracking tools, such as reports, for Senior Leaders.
